

Training Time

```
You are given a proof term: {PROOF_ (LEAN/ROCQ)_TERM}  
Your task is to derive a sequence of tactics that  
corresponds to this term.  
[...] (* FORMATTING INSTRUCTIONS *)
```

Prediction

Think block 1

(Lean/Rocq) Script block 1

Think block 2

[...]

Lean to Rocq

```
You are given a proof term: {LEAN_PROOF_TERM}  
Your task is to derive a sequence of tactics that  
corresponds to this term.  
[...] (* FORMATTING INSTRUCTIONS *)
```

Hardcoded prefix think block 1

<think> Okay, let's try to transform this proof term into a sequence of **rocq** tactics. First let's write down the hypotheses, and the initial goals {rocq_initial_goals}.

Continue generation

End of think block 1

Rocq script block 1

Rocq to Lean

```
You are given a proof term: {ROCQ_PROOF_TERM}  
Your task is to derive a sequence of tactics that  
corresponds to this term.  
[...] (* FORMATTING INSTRUCTIONS *)
```

Hardcoded prefix think block 1

<think> Okay, let's try to transform this proof term into a sequence of **Lean** tactics. First let's write down the hypotheses, and the initial goals {lean_initial_goals}.

Continue generation

End of think block 1

Lean script block 1
